ENHANCE PROCEDURE RELIABILITY

ACHIEVE RESTORATION LONGEVITY

SINGLE-UNIT CROWN TOTAL PRACTICE SOLUTION™
PRODUCTS. EDUCATION. SUPPORT.
Success every time. Over time.

The single-unit crown procedure has a significant impact on the profitability of your dental practice. With multiple procedural steps, involvement of the dentist, the dental assistant, the lab, two appointments, and time between appointments, any misstep along the way can put restoration longevity and profitability at risk.

To achieve a strong foundation and long-term success, you need a solution that simplifies the procedure every step of the way. Introducing the Single-Unit Crown Total Practice Solution from Dentsply Sirona Restorative. A complete solution for overall restoration success, reliability, and longevity.

Learn more at www.SingleUnitRestorations.com
It can get complicated.

Not only are there many elements to the single-unit crown procedure, but there is the possibility for added complications along the way. By addressing five critical steps in the single-unit crown procedure, Dentsply Sirona Restorative has designed a complete solution to deliver greater efficiency, predictable clinical outcomes, enhanced auxiliary staff usage, and overall patient satisfaction.
But it doesn’t have to be.

Enhance PROCEDURE RELIABILITY through accuracy
and strength

You need a process that creates an accurate fitting provisional crown to protect the prep and surrounding tissue between visits and a final impression with perfect margins that allows the lab to build the most accurate permanent crown.

Achieve RESTORATION LONGEVITY through simplified cementation and cleanup

You need a provisional cement that holds strong and comes off leaving no residual cement and a definitive cement with immediate bond strength and easy cleanup for long-term restoration success.

1. Repair and remakes can cost an office $900 or more a month in lost production.

2. Recementation visits can cost $115 in office revenue.

3. 21% of crown failures are due to secondary caries due, in part, to excess cement.
Accuracy and strength in every case.

With a no compromise material for your everyday impression needs you don’t have to choose between wettability, tear strength, speed, and delivery.

Aquasil Ultra+ impression material delivers performance when and where you need it most, intraorally. Formulated for clinical performance across all areas means better tear strength, hydrophilicity, delivery, and set-times.

A clinically appropriate delivery system.

Precision and control are critically important to the delivery of your low viscosity impression material. Leverage the power of a delivery system designed around you and your procedure.

digit Power Dispenser overcomes the challenges of traditional 50mL and back-filled syringe delivery systems by getting you closer to the prepared tooth without the weight and physical strain.

Restoration success starts with an accurate matrix.

High detail and dimensional stability help to counteract the most common provisional pitfalls like open margins, rough margins, bad contours, or poor occlusal contacts.

Algin•X Ultra material delivers predictable accuracy with dimensional stability, requiring less polishing and adjustment, and providing a permanent record.

Algin•X™ Ultra Alginate Alternative

digit Power® Dispenser

Accuracy and strength in every case.

Designed to be strong from the start.

Broken provisionals need not be a part of doing business. Look for a high-strength, on-command light cure material that is highly polishable to ensure future tissue health.

Integrity Multi•Cure material delivers strength exactly when and where you need it, allowing for immediate trimming and adjusting via on-demand light curing.

Integrity® Multi•Cure Temporary Crown & Bridge Material

Continue with an eye on the final visit.

The right provisional cement sets the tone. Choose a strong cement that minimizes the threat of post-op sensitivity while leaving a clean field for the next step.

Integrity TempGrip cement utilizes simplified cementation at both the seating of provisional and removal during the second visit for a more efficient cleanup.

Integrity® TempGrip® Temporary Crown & Bridge Cement

An easy finish with long-term benefits.

75% of cement users have used a bur to remove excess resin cement. A longer tack cure window and extended gel phase virtually eliminate the problems associated with excess cement.

Calibra Universal cement offers easy cleanup and long-lasting results with no bonding agent required, for nearly any indication where a retentive preparation exists.

Calibra® Universal Self-Adhesive Resin Cement
Optimized solutions provide:

Dentsply Sirona Restorative prides itself on creating solutions that provide unique advantages at every procedural step. Our exclusive procedural solution and its products are designed to mitigate the clinical difficulties you face every day and deliver consistent benefits for you, your lab, and your patients.

Dentsply Sirona Restorative’s tips, tools, and techniques empower you to fundamentally elevate the overall performance and profitability of your practice.

High-Performance Advantages:

NATURAL HYDRATION

Dentsply Sirona products are designed to avoid introducing any additional trauma to the prepared tooth. Unlike leading competitors, our temporary cement and impression materials work effectively and efficiently in the presence of moisture. Preparation that doesn’t require dehydration helps to avoid over desiccation, simplifies the steps in your procedure, and helps lower the risk for post-op sensitivity.
Optimized solutions provide the best overall procedure. Unique advantages at every procedural step. Our exclusive procedural solution every day and deliver consistent benefits for you, your lab, and your patients. Fundamentally elevate the overall performance and profitability of your practice.

ADDITIVE SOLUTIONS

The single-unit crown procedure has many moving parts. Dentsply Sirona Restorative is the only complete solution to break down each of these parts and develop highly optimized products that satisfy the needs of dentists, dental assistants, and dental laboratories at each critical step. We then ensure that these products not only work well but also work well together to create efficiencies and deliver long-term clinical success – ultimately providing a unique and comprehensive procedural solution.

ASSISTING THE ASSISTANT

Successfully executing the single-unit crown procedure requires not only the skills of the dentist but also the skills of the dental assistant. Undertrained or underutilized auxiliary staff represent unnecessary office inefficiencies. Dentsply Sirona Restorative can help you train and better utilize your staff for improved procedural and practice efficiency.

SINGLE-UNIT CROWN TOTAL PRACTICE SOLUTION™
Total Practice Education

In addition to our dedicated customer support, the Dentsply Sirona Clinical Education Department offers a variety of continuing education opportunities. From webinars to ongoing seminars to in-office demonstrations, we know that the best way to better patient care is through continuous learning.

Bring your entire office together with the Total Office CE Series, our exclusive program designed to help you build a more successful dental practice model. It’s designed to bring the front and back office together for an event that focuses on team dynamics, business opportunities, and sound clinical dentistry. From doctors and hygienists to dental assistants and office staff, it’s the perfect educational opportunity for your entire practice to learn today and grow tomorrow.

For a complete list of our Dentsply Sirona 360° events, visit www.SingleUnitRestorations.com/360.
At Dentsply Sirona Restorative, we pride ourselves on being the authority for making single-unit restorative procedures more efficient, effective, and successful. Our dedicated customer support team has over 200 years of combined experience with a focus on providing you with industry-leading customer and clinical support.

One-on-One Service & Support

As a part of our Single-Unit Crown Total Practice Solution, you’ll have complete access to:

- Procedural insights/Product support
- Single-Unit Crown Total Practice Solution in-office consultation
- Live phone support

It’s a partnership of resources and tools that we believe can result in a more successful practice and better patient care. Contact your Dentsply Sirona representative today to learn more.
